

Air Link Rural Broadband (Air Link) will be installing fiber optic cables and equipment on your property. Air Link will contact Missouri One Call upon receiving this signed agreement. Their trained locators will detect and mark the following lines within the selected work area:

- Electric Wire between the electric company's main line and your electric meter,
- Telephone Company owned lines to your service
- Natural Gas Line to your house
- Any village-maintained sewer and water lines.

It is the responsibility of the homeowner/property owner to locate and expose any other facilities on the property along the proposed work route indicated by white flags/paint, within five (5) working days of this agreement being signed.

- **Private electric lines (to sheds, lights, exterior outlets, etc.)**
- **Propane/fuel oil lines**
- **Sewer/Septic lines**
- **Water lines (Hot tub, animal water system, geothermal, etc.)**
- **Drain Tile**
- **Outdoor wood stove lines**
- **Satellites or other telecommunication wires**
- **Sprinkler Systems**
- **Underground dog fence**
- **Any other buried items**

When emergency repairs are required due to a fiber cut or other manmade damages provider will perform and bill for the repairs. Unless the provider was directly responsible for the fiber damage, the property owner would be responsible for labor and material costs up to \$160/hr. For emergency repairs necessitated by "Acts of God", Provider will perform the repairs, and cover the costs.
